15th August 2014

Dear Borja,

Congratulations to M50 Concession Ltd from the CDP Ireland Network for submitting your first CDP response in the 2014 reporting cycle. This is an important step in demonstrating your organisations understanding of the effect of business activities on climate change.

M50 Concession Ltd now joins an influential group of corporate climate change leaders, which includes 30 Irish companies and thousands of companies around the world. CDP works to transform the way the world does business to prevent dangerous climate change and protect our natural resources. We see a world where capital is efficiently allocated to create long-term prosperity rather than short-term gain at the expense of our environment.

Evidence and insight is vital to driving real change. We use the power of measurement and information disclosure to improve the management of environmental risk. By leveraging market forces including shareholders, customers and governments, CDP has incentivized thousands of companies and cities across the world's largest economies to measure and disclose their environmental information. We put this information at the heart of business, investment and policy decision making.

The CDP Ireland Network look forward to M50 Concessions Ltd's further participation in the CDP.

Regards,

Gavin Whitaker
